Pridesides for all designs can be viewed at ringdesignonline.com.
- Space under line 8: Use to write in any stones not listed on line 5. Examples Pink Z, Ocean Teal, or Royal CZ colors.

Metal Choices: All of our metals have been tested for beauty, durability, and customer satisfaction. Choose the metal that meets your needs.

Ultrium: This is a beautiful, bright silver metal. It is the same fine jewelers stainless that Rolex uses in their watches, **affordable and durable.**

Approximately 65% of our rings are now made from Ultrium. A very popular choice because of price, silver color, and durability.

Extreme Aurista (Sunglo): Contains 19% gold, 54% silver, and 25% palladium to make a precious metal ring that looks like yellow gold.

Extreme Silver Alloy: This is a very bright polished silver alloy that combines **PLATINUM** with silver to make a **strong durable beautiful ring.**

Approximately 20% of our rings are now made from Extreme Silver. A popular choice because of the Platinum, and other precious metals.

Extreme Silver is actually a brighter silver than White Gold and just as durable.

10k yellow or white gold: This is a solid gold ring with a 10k weight. World gold prices are now over \$1225 per ounce.

14k yellow or white gold: Ask sales representative for pricing on 14k weight rings.
